MASTER OF SCIENCE THESIS

For obtaining the degree of Master of Science in Mechanical  
Engineering at Delft University of Technology

N.N. Vo

January 17, 2017

The work in this literature survey was supported by Alten. Their cooperation is hereby gratefully acknowledged.

# List of Tables

---

# Acronyms

**DUT**      Delft University of Technology

---

# Chapter 1

---

## Introduction

This is a L<sup>A</sup>T<sub>E</sub>Xthesis and this is Chapter [1](#). If you want to know more about L<sup>A</sup>T<sub>E</sub>Xyou better read [\[?\]](#). It contains an acronym of the Delft University of Technology ([DUT](#)). The [DUT](#) is our University.

# **Part I**

## **First Part**

---

## Chapter 2

---

# First Real Chapter

This is real chapter for Delft University of Technology ([DUT](#)), ok? I will explain everything about  $\gamma$ . Next, everything will be explained about the transfer function  $H(s)$ . Also, subscripts and can superscripts can be put in the nomenclature list. Other things can also be added to the nomenclature list of [DUT](#).

### 2-1 First section

This is the section. Referring to equations, figures and tables can easily be done by the commands `\eqnref{}`, `\figref{}` and `\tabref{}`.

$$H(s) = \frac{1}{s+2} \quad (2-1)$$

You see? Refer to equations like this Eq. ([2-1](#)).

#### 2-1-1 The first subsection

**The first sub-subsection with a very very very long title, but in the table of contents one can only see the short title**

Nice, ain't it?

**A paragraph.**

## **Part II**

# **Second part**

---

## Chapter 3

---

# Second part chapter

Figure 3-1: this is a very long line to test if the table of figures will wrap the line or will continue to go over the border of the page

---

## Chapter 4

---

**TEMP second part chapter this is a  
very long line to test if the table of  
figures will wrap the line or will  
continue to go over the border of the  
page**

New chapter gives a full acronym Delft University of Technology ([DUT](#)).

$$1 = 2 \tag{4-1}$$

$$x = 5 \tag{4-2}$$

$$y = \theta \tag{4-3}$$

TEMP second part chapter this is a very long line to test if the table of figures  
12 will wrap the line or will continue to go over the border of the page

---

---

## Chapter 5

---

# Second second part chapter

This is a test for nomenclature  $A(s)$

---

# Bibliography

---

# Appendix A

---

## The back of the thesis

### A-1 An appendix section

#### A-1-1 An appendix subsection with C++ Listing

```
//                                     1
// C++ Listing Test
//
#include <stdio.h>
for(int i=0;i<10;i++)                6
{
    cout << "Ok\n";
}
```

#### A-1-2 A MatlabListing

```
%
% Comment
%
n=10;
for i=1:n                             5
    disp('Ok');
end
```

---

## Appendix B

---

# Yet another appendix

### **B-1 Test section (again?)**

Ok, all is well.
